

CO -- It's a Gas!!!

Is carbon monoxide a threat to you when flying? Are you sure? When was the last time you thoroughly and properly checked? The combustion engine in the airplane you fly creates colorless and odorless carbon monoxide (CO). This CO can inadvertently enter the cabin area and pose a serious threat while flying. Learn more about this potentially deadly and silent killer and how you can improve your chances of not having carbon monoxide poisoning happen to you.

Directions: From Dallas, go Eastbound on I-30 towards Texarkana. Take I-30 Exit 89 (FM1570). Go East on FM1570, cross CR34 and continue to just past entrance to Oak Creek Country Club. Turn RIGHT on Andonian Drive. Turn RIGHT again on FM 2101. Go about 1/4 mile, and turn LEFT on Majors Road into the Greenville Municipal Airport. Follow road to end at the Terminal parking area.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
